in recent years the united kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been in a landmark analysis of the current state of britain s regional development philip mccann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation the uk regional national economic problem brings attention to the highly centralised top down governance structure that the uk deploys and demonstrates that it is less than ideally placed to rectify these inequalities the north south divide in the uk has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status

and wealth whilst the traditional economic dominance of london and its hinterland has continued along with relative resilience in the south west of england and scotland in contrast the midlands the north of england northern ireland and wales lag behind by most measures of prosperity this inequality is greatly limiting national economic performance and the fact that britain has a below average standard of living by european and oecd terms has been ignored the uk s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented this pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

the economics of scientific misconduct explores episodes of misconduct in the natural and biomedical sciences and replication failure in economics and psychology over the past half century here scientific misconduct is considered from the perspective of a single discipline such as economics likely for the first time in intellectual history research misconduct has become an important concern across many natural medical and social sciences including economics over the past half century initially a mainstream economic approach to science and scientific misconduct draws from conventional microeconomics and the theories of becker ehrlich and c s peirce s economy of research then the works of peirce and thorstein veblen from the 19th century point toward contemporary debates over statistical inference in econometrics and the failure of recent macroeconomic models in more contemporary economics clashes regarding discrimination and harassment have led to a code of professional conduct from the american economic association and a code of ethics from one of its members the last chapter considers research ethics matters related to the covid 19 pandemic there has been an explosion of research and some retractions more generally a concern with research ethics contributes to scientific progress

by making some of its most difficult problems more transparent and understandable and thus possibly more surmountable this book offers valuable insights for students and scholars of research ethics across the sciences philosophy of science and social science and economic theory
